

Press Release
17th November 2009

GSE, Turnkey Contractor, strengthens its development teams

In support of its development strategy and the diversification of its activity in different markets and geographical territories, the GSE group announces the new organisation of its development teams.

Robert de Marchi, is Head of Development for the « grand export » and « major projects » departments. He is also appointed as **Director of Strategy and Development** for the group. (Robert de Marchi joined the GSE group in 1993 and he has successively held positions as Project Director, Commercial Director for the industrial sector (clean rooms, research and development centres, production plants) and Director of design and build activities for projects within the « Industrial and Services » business unit).

Florian Wnuck, who has German nationality, is appointed as **Director of International Development** and will be responsible, notably, for establishing the international « key accounts » policy of the group. (Florian Wnuck joined the GSE group in 2004 as business development manager in France).

Thierry Chambellan is appointed as assistant general manager of GSE and as general manager of GAM INGENIERIE, a company specialising in the construction of retail parks in France and at an international level. (Thierry Chambellan joined GSE in 1998 and has successively held positions as a project engineer, manager of large scale projects (logistics and technological projects), development manager for the service and health sectors and then Commercial Director for the « Industrial and Services » business unit).

Bertrand Chabanne, is appointed as **Commercial Director, France, for GSE**. He will also coordinate the development of the NAZCA subsidiary, specialising in the design, installation and operation of photovoltaic energy stations. (Bertrand Chabanne joined the GSE group in 2001 as part of the commercial team in France. In 2004, he was involved in the creation of CCR and became Commercial Director of this subsidiary which focuses on regional projects and which, today, has 14 regional offices).

Philippe Rougé is appointed as **Commercial Director of structure** which has a mission of **research and development of land sites, the creation of a land reserve as well as establishing financing solutions for projects**. This activity adds to the design and construction activities for real estate projects resulting in a total service offer to direct user clients and new opportunities for investor clients. (Philippe Rougé joined the GSE group in 2004 to manage the development activity of the logistics sector in France).

About GSE

GSE is an engineering company which was created 30 years ago as a turnkey contractor business; an original concept which brings together, around the construction itself, all the skills necessary for the “turnkey” completion of a building project and covered by a single contract guaranteeing the cost and the timescale. Over the years, this concept has become well established due to its relevance, innovative vision and the perfect response it provides for the construction projects of companies that GSE works with on an international basis. The group has a presence in 17 countries and employs 450 people. In 2008, the group achieved a turnover of 655 million Euros.
